■Specifications

Item		JFX200-2513 EX		
Head		On-demand Piezo head (Array of 3 staggered print heads)		
Print resolution		300dpi, 450dpi, 600dpi, 900dpi, 1,200dpi		
Ink Type/Color*(3)(4)(5)		Rigid UV curable ink LH-100		
		Stretchable UV curable ink LUS-120/LUS-150/LUS-350		
	Capacity*(1)	1L bottle / 250 ml bottle		
	Ink circulation sysytem*(2)	White ink circulation by MCT (Mimaki Circulation Technology)		
Maximum printable area (V	VxD)	2,500 x 1,300 mm (98.4x 51.2")		
Media	Size (WxD)	2,500 x 1,300 mm (98.4x 51.2")		
	Height	50 mm (2.0 ") or lower		
	Weight	50kg/sqm (110.2 lb/sq. ft2) or less (non concentrated load)		
Media Suction		Vacuum Suction + Foot Switch		
Suction Areas		2 partition (X direction)		
UV method		LED-UV		
Interface		USB, Ethernet		
Applicable standards		VCCI class A, CE mark, CB report, U.S. safety standard UL (UL62368-1),		
		RoHS Directive, FCC Class A, Machinery directive, EAC, RCM		
Power		Single-phase AC200 to 240V, 12A or lower		
Power consumption		2.88 kVA or less		
Operating environment	Temperature	15-30 degC (59 - 86 degF)		
Temperature	Humidity	35 - 65%Rh		
	Optimal Temperature	20 - 25 degC (68 - 77 degF)		
	Temperature Gradient	Less than \pm 10 degC/h (\pm 18F/h)		
	Dust	Equivalent to an Office		
Installatoin Dimensions(W x D x H)		4,440 x 2,250 x 1,250mm (173.2 x 88.5 x 49.2")		
Assembled Dimensions (W x D x H)		4,440 x 2,450 x 1,250mm (173.2 x 96.4 x 49.2")		
Weight		650kg (1,433 lb)

*1: LH-100, LUS-120 and PR-200 come in both 250ml and 1L bottles. *2: MCT works only with white ink 3: The LUS-350 will be applied later. *4: The PR-200 is not compatible with LUS-350. *5: The LUS-350 will be applied late ¹ Stretchability of flexible ink may vary depending on materials, please have a prior test print. ¹ LH-100, LUS-120 and LUS-150 are GREENGUARD Gold cartification ink.

Optional Accessories

Item No.	Remarks
OPT-J0342	Static eliminator kit
OPT-J0216	Three-phase, 200 V-240 V, 30 A, 3.4kW
OPT-J0217	Single-phase, 200 V-240 V, 30 A, 1.9kW
OPT-J0232	Three-phase, 380 V-480 V, 20 A, 3.4kW
OPT-J0348	Necessary kit for connecting an optional vacuum unit
OPT-J0499	Necessary kit for 4C+4White ink set
OPT-J0513	
	OPT-J0342 OPT-J0216 OPT-J0217 OPT-J0232 OPT-J0348 OPT-J0499

optional accessories available with JEX200-2513 are also compatible with JEX200-2513 EX.

*OPT-J0393 PR-100/PR-200KIT is not necessary to use JFX200-2513 EX. However when starting to use PR-200, it is necessary to replace to the pump of the initial attachment

Inks and substrates:

-As physical properties of ink (adhesion, weather resistance etc.) are different depending on media, please be sure to have a print test in advance.

 Depending on the application, primers, other surface treatment or surface protection such as lamination may be necessary.

About Ethernet

*Please use Category 6 (CAT6) network cables. *Cannot be connected through the router. *When printing from ethernet, place the printer and output PC on the same network. *When using a switching hub, a 1000BASE-T compatible hub is necessary. *Although up to 4 printers can be registered with RasterLink6Plus, printing may stop depending on the network environm

A Safety notice:

This product is equipped with UV irradiation equipment

Please pay attention to the following notes in order to use safely. •Do not look directly into the UV light source nor place your hand, or expose your skin directly to the UV light source Depending upon print mode, some VOC emittance from printed parts not yet cured and hardened may occur In addition, please be sure to read and follow the instructions and guidelines of the manual carefully.

Some of the samples in this catalog are artificial renderings. Secifications, design and dimensions stated in this catalog may be subject to change without notice (for technical improvements, etc). The corporate names and merchandise names written on this catalog are the trademark or registered trademark of the respective corporations. Inkjet printers print using extremely fine dots, so colors may very slightly vary after replacement of the printing heads. Also note that if using multiple printer units, colors could vary slightly from one unit to other unit due to slight individual differences. The specifications described in this catalog are as of July 2022.

Automation of printing processes

Adaptable to "Mimaki Device Language (MDL)" to realize automation of printing processes

Using MDL commands allows you to automate printer control, job management, and workpiece conveying device operation from an external device

*When using MDL commands, refer to the separate MDL commands manual included in the SDK *Please note that machine failures due to MDL commands may not be covered by our warranty.

mode, which can create more beautiful white

printing

Supported ink types

Suitable for large format sign graphics, interior/decoration and fine arts. seeking quality

Three image control technologies to realize high quality

.... •...

"2.5D Texture Print" in "RasterLink6Plus"! Stereoscopic appeal with 2.5D printing

Semi-stereoscopic 2.5D printing made easy !

A newly developed function, "2.5D Texture Print" in Mimaki's original RIP, "RasterLink6Plus" allows you to easily create multi-layered gradation data.

High value-added printing with

The "Emboss Print", one of Mimaki's printing solutions, "Surface Imaging" makes a surface look bumpy with multi-layered UV ink printing, which requires a manual preparation of step-wise data for each layer to create smoother expression. However, "JFX200-2513EX" allows you to easily create 2.5D print data of different layer with steps, simply by using "RasterLink6Plus" (Standard accessory) and Illustrator/Photoshop

When stacking layers of the same size When stacking stepped laver

othness cannot be achieved. but data is needed for each layer but sr

You can create data using Photoshop/Illustrator and Raster Link Geus

Simple creation of smooth-stereoscopic 2.5D prints is available with the JFX200-2513 EX to easily show the bumpy surface like woodgrain of interior material, elevated ink of oil-paintings and letters for an impressive look for signage. Not only coloring but also adding smooth print texture can deliver added value.

Higher-grade productivity and doubled White + Color simultaneous print speed!

The printer allows you to respond to demand for short-term delivery.

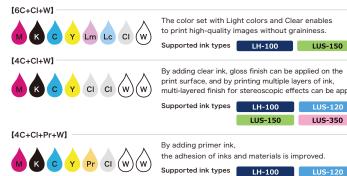

JFX200-2513 EX prints two times as fast as JFX200-2513 in White + Color simultaneous printing. The newly added Draft mode (300x300HQ 4P Bi Normal) can deliver print speeds up to 35m2/h (376.7 ft2/h) in 4-color + White simultaneous printing.

High Quality

1.7(18.3) *Time taken for setting materials and the printer's operating time before or after printing are not considered

I You can choose the most suitable ink depending on your material and application.

High Quality

or stereoscopic effects can be applied.			Please u	use OPT-J0499(4C+4)	Wthie ink applying kit) for [4C+4W] printing.

4

The NCU is newly mounted !

Links with external stop interface allow users to meet safety standards that are different by factory

Other than the standard emergency stop switch, customers can also have the printer work with safety measures that suit their environmen The product can support various safety standards depending on the customer, including safety light curtain and safety mat.

1. Waveform control

By discharging spherical ink droplets directly, depositing of droplets and overlapping between dots is reduced, achieving a sharp print quality with low grain.

< Non-spherical discharge:

High precision landing is possible. Sharp finish with little grain.

2. Variable dots

Three different ink dot sizes are used in printing to enable high-quality prints with reduced graininess.

< Fixed Dot Image

< Variable Dot Image >

Dots are combined including the minimum size of 5pl to enable grainless, smooth color printing.

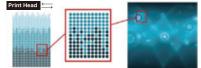

3. MAPS (Mimaki Advanced Pass System)

Banding (horizontal stripes), uneven color, or glossy streal can be reduced to produce smooth prints by printing pass , boundaries fading in gradation.

< Without MAPS (Image) >

< With MAPS (Image) :

Based on printing conditions such as media/ink type and resolution, the most suitable gradation pattern is automatically selected and printed.

With Ethernet support

Usability achieved based on

Mimaki's long time experience UV flatbed printers

As a pioneer of UV flatbed printers,

Mimaki knows everything about ease of use from its long experience. We provide the design that is simple to use and reduces workload, plus a preventive safety function to avoid trouble during printing.

Foot switch for vacuum control

More environment-friendly business model

Mimaki UV inks (LH-100, LUS-120 and LUS-150) obtain certification for GREENGUARD GOLD. The "GREENGUARD Gold certification" ensures that products are acceptable for use even in environments such as schools and medical facilities based on the most strict global standard of chemical substance diffusion. The GREENGUARD Gold-certified inks consider ronmental impacts given after printing.
