Features

1 **Templates tailored for specific applications**

Just by selecting a suitable template and editing the text, swinging POP ads, price cards, banners, seals, window signs, etc., can be easily created even without any previous experience using design software.

2 **Cut data is pre-installed.**

"Simple POP" templates incorporate pre-installed cut data. Output from MIMAKI "UCJV300 Series/UCJV150-160" printers incorporate cutting capability that allows for sequential processing of printing and cutting, producing neatly finished designs even for time-consuming and troublesome non-rectangular pieces.

3 **Add-on templates**

100 templates are pre-installed in Simple POP. Additionally another 300 templates can be added by free download from the MIMAKI website.

UV-LED printer/cutter

When combined with
UCJV300 Series**/UCJV150-160**

Automatic cutting for work efficiency

Create data easily with "Simple POP", then print & cut the output using the "UCJV300 Series / UCJV150-160 ". Fully automatic operation improving work efficiency by saving time.

White ink for high added-value

"UCJV300 Series" allow you to use white ink with superior concealing capability. Using white ink as the substrate for color prints on transparent, colored or metallic media enhances the ink color development and achieves vivid print quality.
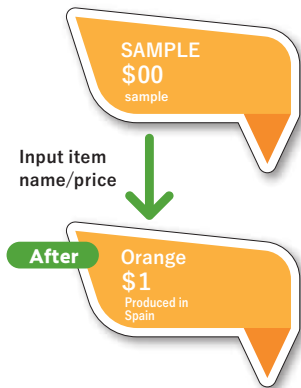

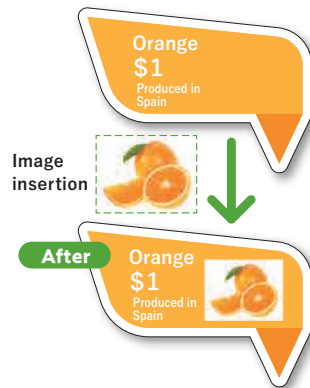

Simple POP work flow

1 Design selection

Select a template or previously created design (generated data can be saved for reuse as a template.)

2 Design editing

Addition of texts, color editing, image insertion, etc.

3 Output

Specify print positioning, number of copies, rotation, mirroring and other attributes for output

---

Features — Various useful functions !

Text editing

Select text and change or add contents. In addition to OS fonts, there are more than 200 Simple POP original fonts available to choose from.

\<Print & Cut\>
Print & Cut LED-UV Curable Inkjet Printer
UCJV300 Series / UCJV150-160

This is a UV-LED curable inkjet printer equipped with high performance, high efficiency and able to print and cut by individual units.
In addition to its UV-LED printing and cutting function, this high-spec model has multi-layer (such as four- or five-layer) printing capability. This all-in-one printer can handle a broad range of processes, from a short delivery job to a super-wide format sign graphic. There are 75, 107, 130 and 160 cm width size models available to suit your work place and media width.
